

Salmon Recovery Grant Program

Purpose: Protection and/or restoration of salmon habitat. Also support feasibility assessments for future projects and other activities.

Eligible Grant Recipients:

- Municipal subdivisions (cities, towns, counties, and port, park and recreation, conservation, and school districts)
- Tribal governments
- Private Landowners
- State agencies

Applicants must provide at least 15% matching funds in either cash or in-kind contributions.

Grant Evaluation Process: All projects must come through the local lead entity group. Lead entity groups submit a prioritized list that has been evaluated by a Technical Advisory Group (TAG) and reviewed and prioritized by the citizen review group.

Once project lists are submitted, the lead entity representatives meet with a SRFB technical panel, comprised of scientists from different disciplines to begin the review process. The technical panel develops recommendations to the SRFB for final funding decisions.

Revenue Source: State funding has been provided through fund shifts from other funding accounts and general obligation bonds. Federal funds are appropriated through the Department of Commerce, National Marine Fisheries Service (NMFS).

Get More Information: Detailed information can be found in [IAC Manual 18 — Salmon Recovery Funding Board: Policies and Project Selection Grants Manual](#) or you can [contact an outdoor grant manager](#).
